Manager's Choice List ..... Inside back cover

What is user-supported software?

The disks listed in this catalog contain programs and files that are considered public domain or shareware. The authors have released their work directly to the end-users of their programs, the computing public. If anyone believes that any program mentioned in this catalog is not in the public domain or shareware, please inform us. If we find this to be the case, we will remove it from our catalog.

Authors of Public Domain software sometimes request a donation from users if they find programs to be useful. Shareware authors require separate payments for continued use of programs beyond a reasonable trial period (usually 30 - 90 days). Software Excitement! strongly encourages users to register all shareware programs that they find useful and intend to use continually. Registration brings many benefits that are quite useful if you intend to use a program extensively. These include printed, bound manuals, free technical support, and new versions and updates. Registration fees are usually far less than the price of comparable programs sold commercially, and you get to try a shareware program before you decide to register it!

Software Excitement! does not *sell* this software. We provide a service to users who wish to acquire quality software without spending large sums of money. Our fees are extremely reasonable when you consider what it takes to provide this service - we maintain a large selection of quality software, print and mail catalogs, advertise, pay shipping charges, provide telephone support and toll-free order lines, buy blank disks, duplicate disks, and process your order with same-day service.

Software Excitement! strives to provide you with the best selection, best quality, lowest prices, fastest shipping, and best service of any company of this kind. Please feel free to make any suggestions that you feel would enhance this service.

BUSINESS

FR. ED. WRITER (6600)

Fr. Ed. Writer is a fantastic word processing package that is very easy to learn. With this program, editing, reformatting and storing files is a breeze. You can create and compose freely; then revise and enhance your writing without re-entering the text.

HOME ACCOUNTING (6101)

Home Accounting — Keep your monthly household accounts intact with this simple budgeting system.

Payment Schedule — Keep track of your payments versus income schedule.

Car Loans — This simple program will calculate payments for car loans based on the down payment and the number of payments.

Finance I -- With Finance I, you can calculate the interest you will receive on savings account balances. This program also does lease or loan calculations.

GENERAL LEDGER (6102)

General Ledger — This small-business accounting package helps you keep track of income and expenditures by breaking them down into various accounts.

CHECKBOOK BALANCER (6103)

This disk contains programs that are designed to help you with your checkbook. There is a check register which you can use to record your deposits and expenditures. Also, there is a program that helps you reconcile your bank statement.

LOANS & MORTGAGES (6104)

This disk contains programs that amortize mortgages and loans, calculate compound interest, and prepare payment schedules.

RENTERS INCOME (6105)

Apt. Bldg. Purchase — This program computes the components of profit as related to the purchase of an apartment building.

Property Mortgage — Calculate property financing with this program.

Renter's Income — Calculate the correct rent to charge based on expenses and the amount of income desired.

MAILING LIST (6106)

Mailing Labels — This is a complete mailing list program that will allow you to sort alphabetically, by zip code, or by last name.

Label Printer — Allows you to create any kind of label.

PHONE LIST (6107)

Phone Directory — Keep track of important phone numbers of clients, friends, and relatives.

Birth/Anniversary — Don't forget important dates such as birthdays and anniversaries. This one helps you keep track of them all.

SOFTGRAPH (6116)

This program allows you to enter and edit data, and then set up a pie chart or a bar line chart.

BUSINESS

STOCKS & BONDS (6108)

Bond Value — This program calculates bond yield values.

Stock Market Evaluator — This program computes stock portfolio valuation, put and call option value, and call option return on investment.

Treasury Bill Valuation — This program calculates the price per $100 and the dollar value of U.S. Treasury bills.

HOME INVENTORY (6109)

Home Inventory II -- Use your computer to keep records of all personal possessions and items in your household. Works on all Apples.

Home Computer Inventory — This program keeps records of personal possessions on the Apple II Plus.

Intruder Alert — Set up your computer to flash intruder alerts on the screen to scare away would-be burglars.

EXPENSE ACCOUNT (6110)

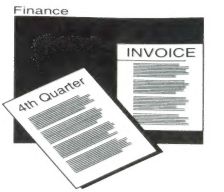
Expense Account allows you to keep a record of all your business expenses incurred on business trips such as travel, entertaining, meals, and lodging expenses. Helps keep track of information, which is very handy to have at tax time.

INVESTMENT PAK (6111)

Investment Pak lets you compare different types of investments to see which one gives the best return. Also computes the future value of an investment and the value of U.S. Treasury bills.

BUSINESS

FINANCE PAK (6112)



These programs are designed to aid consumers and businesses in long or short range planning. Categories include investments, savings and annuities, mortgages and loans, depreciation and amortization schedules, and much more.

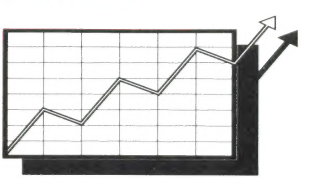
PAYROLL (6113)

Pay Net — Figures the gross pay needed for a given net.
Weekly Payroll — Computes weekly payroll, prints results to QTD/YTD files, prints payroll checks, too!
Time Clock — Helps you calculate hours worked from time cards.

SMALL COMPANY INVENTORY (6114)

Small Company Inventory will generate the following inventory reports: inventory list by class, inventory list by vendor, activity report, and min. quantity search. It will also help you calculate job nutrition rate for parts ordering.

BASICALC/SPREADSHEET (6115)



Basicalc is a 10 col x 69 row spreadsheet program that allows you keep track of information and calculate formulas with ease.

RECIPES A & B (6500, 6501) (2 Disks)

With this two disk set you will get several great recipes for breads, meat dishes, casseroles, desserts, vegetables, and salads, plus:

Recipe Catalog — Catalog and print your favorite recipes.

Metric Kitchen — Converts kitchen measurements to metric.

Metric Temp — Converts cooking temperatures from Fahrenheit to Celsius and vice-versa.

Crockpot Cooking Time — Calculates conventional cooking time versus crockpot time.

Calorie Counter — Count calories with the help of this program.

Calorie Requirements — Gives you daily calorie requirements.

YOUR HEALTH (6502)

Weight Calculator — Calculate the ideal weight for your body type.

Life Expectancy — This program takes information about you and your family history to tell you how long you should expect to live.

Score Your Heart Health — By answering a few simple questions, your chances of having a heart attack will be scored.

Food Value — This program presents graphs on the recommended daily allowances of calories, protein, vitamin A, vitamin C, thiamin, riboflavin, niacin, calcium, and iron.

CLUB ORGANIZER/TRIP PLANNER (6503)

Club Accounting Program — Keep track of your club's dues payments, receipts, and disbursements.

Address & Phone Numbers — Keep track of the addresses and phone numbers of your club's membership with this program.

Travel Cost — You give the distance, miles-per-hour, and miles-per-gallon, and this program figures the gas expenses for your trip.

Decision Maker — This program can help you choose which trip is best for your budget.

MOVIE, MUSIC, AND BOOK LISTER (6504)

Movie List — A handy way to keep track of all your movie videos.

Music Indexer — Keep a list of those special music albums.

Book Inventory — Organize your book shelves with this easy-to-use book inventory program.

BIORHYTHM CURVES (6505)

Biorhythm Curves — Find out when your peak days fall by charting your biorhythms.

Openness Test — Find out how open you are to a variety of things.

ESP Test — See if you're psychic!

Bio Cycle 2 — Plots your biorhythms on the computer screen.

MUSIC WRITER (6508)

Allows you to compose and edit bass and treble clef music.

FOOTBALL PREDICTIONS (6506)

NFL Ranker — This program is for the football fanatic in the family. You can keep track of the weekly match ups, the conference standings, and the predicted outcomes of the games.

Super Scores — Display the teams' scores on your computer.

CALENDAR/POSTER (6507)

Calendar and Poster — Print your own calendars and posters.

Calendar — Another program that lets you print calendars and posters on your screen or printer.

FAMILY TREE (6520)

This program allows you to keep records of your family's history. The records it will keep include marriages, births, and deaths. (Will not work with Apple+).

BIBLE QUIZ I (6530)

Quiz your knowledge of the books of the Bible, the animals of the Bible, and the Apostles. You can also test your knowledge of events and the people involved. Bible word scrambles are also featured.

BIBLE QUIZ II (6531)

This disk quizzes you on the meaning of Bible names, plays hymns and shows words, and lets you play Name That Hymn. You can also create your own Bible quizzes.

YO-YO DUCK (6414, 6415) (2 Disks)

Yo-Yo Duck is a Pro Dos diagnostic program which you can use to test your cable connections, monitor, speakers, video chips, hi-res and double hi-res graphics, disk drive, joysticks, keyboard and memory, and printer. It also enables you to test your Apple II expansion memory card. (Not for Apple II+.)

GRAPHICS PAK (6420-6423) (4 Disks)

These are graphics to be used with your Printshop Graphics program. These disks include graphics of fish, animals, planes, trains, automobiles, boats, spaceships, and holiday items, as well as graphics especially created for professional people.

UTILITY PAK 3 (6403)

Bell - Replaces "CTRL G" with a more mellow sound to retain your sanity.

Catprint - Simply outputs a catalog of the currently active disk to your printer and allows you to title the catalog.

Disk Arranger - A utility which allows you to change the order of files on the disk and permits you to enter titles (and other illegal file names) into the catalog of a disk.

Disk Catalog - A master catalog utility. Disk Cat will save the catalogs of all your disks in a text file. The file will also include free space on each disk. Non-standard DOS disks can be manually entered.

Disk Check - A short program which does a checksum verification of each sector on each of a disk's tracks. If a bad sector is found, it will be printed out.

UTILITIES

UTILITY PAK I (6400)

Ram Test 48K - Test your 48K RAM for problems.
Joystick/Paddle Tester - Test your joystick's response to movement.
Text File Reader - This program will display the text file on your screen.
Disk Aid - Allows sector and track editing.
File Deleting - This program allows you to delete those unwanted files.
Recover - Attempt to recover a deleted file that was needed.
Multiple Diskette Initializer - Use this program when you are in need of several disks to be initialized.
Text File Contents - Display the information in your text files with this easy-to-use program.
Number Pads - This program will create a number pad on your Apple keyboard.
LC Killer - Changes lower case letters to upper case.

PARISHWORK (6535-6540) (6 Disk Set) (requires APPLEWORKS V3.0)

This 6 disk set is a collection of over 75 different church management templates that include such files on accounting and budgeting, attendance, contributions, goals and evaluation, leader and teacher development, music, stewardship commitments, worship, etc. Also includes three non-computer simulation games that deal with the Bible and church history:325 A.D., the Gospel Game, and Council of Jerusalem.

TEACHER'S HELPER (6201)

Answer Sheet Generator — Creates mult. choice answer sheets.

Gradebook — Calculates averages, displays student grades, keeps grade records in order.

Exam Curve, Grade Curver, and Average Letter Grade — Automatically calculate the average grade to prepare a curve.

Exam Scores — Shows how test results compare between classes.

Spelling Test — Allows you to input a spelling list into the computer so that the students can test themselves.

BEGINNING TYPING PRACTICE (6202)

Typing and Typing I — Drills to improve your typing skills.

Speed Read — This program flashes a sentence or phrase on the screen and asks you type it back. Also good for memory skills.

Remember Letters — Flashes letters and asks you to type them.

FIRST AND SECOND GRADE MATH (6204)

Add, Sum, Math Drill, Addition, Subtraction — All of these programs are set up to improve your 1st and 2nd grader's math skills in addition and subtraction. Also included are programs that teach your child to tell time and to make change.

PRESCHOOL FUN LEARNER (6203)

Preschool Letter Recognition — This program flashes a letter on the screen and asks your preschooler to find the same letter.

Preschool Fun Pak — These programs let your child practice the ABC song while the computer puts the alphabet on the screen, teach your child the names of their fingers using the thumbkin song, and let your child practice and memorize the ABC's while changing the colors of the letters on the screen.

Shape Recognition — Your child must match the shapes correctly in order to receive a smiley face.

Shapes — A shape flashes on the screen. Your child then draws the shape on paper. After the computer has shown all the shapes, it plays them back again so your child can check his work.

Music Children — Your child will enjoy singing along with songs they know such as Mary Had a Little Lamb; Twinkle, Twinkle, Little Star; Yankee Doodle; Row, Row, Row Your Boat; Three Blind Mice; It's a Small World; and more.

MULTIPLICATION & DIVISION FUN (6208)

The programs on this disk provide drills that will improve your child's multiplication and division skills. These drills range from basic multiplication and division to multi-place multiplication and division problems, including division problems with remainders. The drills are Multiplication Bingo, ArithmeTic-Tac-Dough, Math Multiply Drill, Math Drill Hard, Math in Color, Super Math, Math Tutor, Math Division, Math Division Calc I, and Long Division.

EDUCATION

3rd AND 4th GRADE MATH (6206)

Math Willie Worm — Try to complete Willie Worm's body by correctly solving problems on addition, subtraction, and multiplication. There are several levels to choose from.

Tic Tac Add — Win squares by correctly solving addition problems to make Tic-Tac-Toe.

Math in Color — Try to earn smiley faces by completing addition, subtraction, and beginning multiplication problems.

Flash Cards — Addition, subtraction, and multiplication drills.

Addition Drill, Addition, and Sound 1 & 2 — These drills will improve your child's skills in large place addition and carrying.

Word Problems — Beginning drills in word problems.

Telling Time — Teaches kids to tell time by the hands on a clock.

Making Change — This program drills your child in counting money and making change.

Counting Coins — A drill in adding up change.

PRE-ALGEBRA (6213)

Elevate — A fun game dealing with angles. Try to hit the target by calculating your cannon's firing angle.

Solving and Graphing Linear Equations — Drill yourself on linear equations.

Perimeter and Area Drill — Practice your skills with perimeter and area problems.

Square and Cubed Number — Find the square and cube of a number.

Brain Busters -- Solve the algebraic word problems.

FRACTION AND DECIMAL DRILLS (6210)

Fraction Practice — Improve your skills in the addition, subtraction, multiplication, and division of fractions. This program will show you the correct way to work out the problem.

Adding Fractions — Drills you on the addition of fractions.

Balloons — Try to pop the balloon by guessing the correct fraction.

Fractions to Decimals — Converts fractions to decimal form.

The Colt Race — Race your colts by solving decimal problems.

Add Frac Dec — More practice at adding fractions and decimals.

Advanced Guess My Fraction — Try to guess the fraction the computer is thinking of.

METRIC PRACTICE (6211)

This disk will help with metric conversions of pounds, ounces, tons, inches, yards, acres, miles, quarts, gallons, temperature, hours, and seconds to centimeters, meters, grams, kilograms, liters, kilohours, celsius, and hectares.

FUN MATH GRID GAMES (6212)

Chomp — Try to avoid eating the poison cookie in this grid game.

Mugwump — Try to guess the position chosen on the grid by the computer.

Baseguse — Try to guess the number the computer has chosen.

ALGEBRA A, B, AND C (6214-6216) (3 disks)

These disks have exercises and tutoring programs covering the following areas: roots, vectors, variances, covariances, slopes, intersecting points, trinomial factoring, finding areas of objects, angles, and matrices.

ENGLISH HELPERS: 2nd & 3rd GRADE (6220)

Syllables — Teaches your child about the syllabification of words.

My Spelling Test — This program allows you to input your child's spelling list. The computer flashes the word, and your child has 25 seconds to spell it correctly on the screen.

E/Drills ING -- Drills in the proper spelling of words ending in "ing."

Memory Game — The computer flashes letters on the screen and asks your child to repeat them by typing them on the screen. With each correct answer, the time for the next series gets shorter.

STATES AND CAPITALS (6230)

State Capital 4 — Test your knowledge of state capitals.

Name State — You must guess the state from clues about it.

Spell the State — You are given a state's abbreviation and must spell out the state name correctly.

NTS — Shows the location of each state on a map of the US.

States Test — Another program that tests your knowledge of states and their capitals.

ENGLISH HELPERS: 4th & 5th GRADE (6222)

Scramble Word — Unscramble the word the computer chooses out of its word list.

A & An — Correctly complete the sentence by filling in the blank with "a" or "an."

ABC Order — The computer shows a word, and your child must put it in alphabetical order.

Antonyms and Synonyms — The computer shows two words, and your child must decide if the words are antonyms or synonyms.

Contractions — This program will familiarize your child with contractions and their meanings.

Plural — Teaches the correct plural of a word.

My Spelling Test — Type your child's spelling list into the computer. The words are then flashed on the screen for your child to type back. The computer keeps score and offers a list of the words your child needs to study more.

ROOTS, PREFIXES, AND SUFFIXES (6225)

These programs will teach and quiz your child about root words, prefixes, and suffixes.

VOCABULARY HELP GRADES 6-12 (6226)

SAT Test – The computer gives you a word, and you categorize it with similar words.

Dictionary Game — This game is designed to teach you new vocabulary and familiarize yourself with the dictionary.

Vocab & Word — The computer keeps score as you are drilled with matching a word to its correct meaning.

HISTORY (6232)

Middle Ages Quiz — Tests you on your knowledge of early history.
History Quiz — You select a famous historical person, and the computer tries to guess that person's name.
Date in History — Gives you an event in history. You must choose the correct date from a list of dates.
Name that Date — Gives you the date, and you provide the historical event.

GEOGRAPHY (6234)

Geography — The computer gives you the name of a geographical place. You take the last letter of that place and enter a new geographical place beginning with that letter.
Capitals of Countries — Quiz your knowledge of the capitals of countries including the capitals of the countries' districts.
Capitals of Nations — Test your knowledge of national capitals.

SCIENCE (6240)

Production of Light — A demonstration of the production of light.
Static Electricity — A demonstration of static electricity.
Org. Chem. I — Teaches the basics of organic chemistry.

PLANETS (6246)

These programs give you facts about the planets. You try to learn which facts belong to which planets.

ASTRONOMY (6244)

This interesting and educational disk will show you the different constellations and their positions in the winter sky.

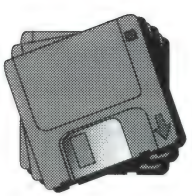
TW SPEEDKEYS (6250)

Speedkeys is an application for evaluating a typist's speed and accuracy. It requires an Apple IIE, IIC, or IIGS with a minimum of 128K RAM and 80 column capability. The typist keys in the text and when time is up the computer will total and calculate the recognizable errors and gross words per minute.

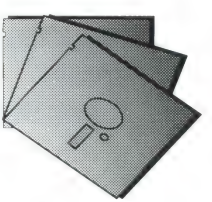
PROGRAM DISK PRICES

The more you order, the more you *Save*!

(ADD $1.00 PER DISK WHEN ORDERING 3 1/2" SIZE)



Quantity	Price
1 - 4	$3.99 EA
5 - 14	$3.50 EA
15+	$2.99 EA



Above prices are for 5 1/4" disks.
For 3 1/2" disks, please add $1.00 per disk.

PRE-SCHOOL FUN GAMES (6300) (Joystick)

Goal Mine — Get the block into the goal area before the computer.
Dunking Machine – Line up your shot to dunk Mr. Jack Nife.
Four-in-a-Row — A lot like Connect Four Game.
Deflecto — Use the bouncing ball to hit the smiley faces.
Kaleidoscope — Your child will love this beautiful kaleidoscope.
Shark — Make your shark eat as many little fish as possible before you run out of time.
Snakes Snacks — Gain points by eating bugs.

BEGINNING GAMES (6301) (Joystick)

Tic-Tac-Toe — Beat the computer in a game of Tic-Tac-Toe.
Turn-a-Block — Flip the blocks to make them all your color to win.
Towers — Take the pieces of the tower to make new towers.
Snake — Go through the maze eating the open blocks, avoiding the solid walls and running into yourself.
Fly Killer — Try to kill the pesky flies using your bug spray.
Kwak Stak — This is a memory game where the computer gives you either an egg or a duck and then quizzes you on the sequence.

Kids Adventure — This is a beginning text adventure.
Carrying Balloon — Try to maneuver your man so he doesn't pop his balloon while trying to make it to his goal.
Shootout — Shoot at the other gunfighter and hit him 5 times to win.

SIMPLE SIMON AND MORE (6302) (Joystick)

Simple Simon — A lot like Simon. Play the tones back in the same order as the computer.

Find Hurkle — Hurkle is hiding and your job is to try to find him.

Qubic — Score a win against the computer by connecting four blocks in a row either diagonally, horizontally, or vertically.

Kalah — Try to capture you opponent's sticks in order to have the most and win. Checkers — Play checkers against the computer.

DETECTIVE WORK (6303) (Text Games)

Thief — Someone has stolen a priceless diamond! Find the thief by clues left at the scene.

Inspector Clewso — A murder has been committed! Try to find who the murderer is by questioning the guests.

Kidnapped — You awaken on the 9th floor of a strange building, obviously the victim of a kidnapping. You must try to escape the building, floor by floor, without being recaptured.

STRATEGIC WAR (6305) (Text Games)

Battleship — Guess where your opponent's fleet is placed.

French Military Game — Try to trap your opponent's men.

Tank — Search for the hidden tank.

World War III — Search and destroy your opponent's silos.

Battle — Search to find where your opponent's men are located.

RULERS AND RICHES (6304) (Text Games)

Atom 20 — The world as you know it was destroyed by an atom bomb. You must find what humans you can to keep mankind alive!

Oil — Your rich uncle has left you a large oil business but wants you to keep it in the family. Invest wisely!

Treasure Hunt — The Marpel Caves are said to have many a hidden treasure in them. Few have dared to explore them due to the stories of pirates, dragons, and deep pits.

King — As premier of the Island of Setats Detinu, your job is to decide the country's fate.

Starlanes — The object of this game is to amass the greatest amount of money by buying stock in interstellar shipping lanes.

TREK GAMES (6306) (Text Games)

Star Trek Super — Seventeen klingon warships have invaded federation airspace. You must destroy them within the 26 days it will take them to reach federation headquarters.

Klingon Capture — Your mission is to capture a klingon battle cruiser without destroying it. Destroy all sectors around the ship.

Target — You are the weapons officer on the starship enterprise.

Star Trek .9 — Destroy the 15 klingon warships which have invaded the galaxy before they can attack federation headquarters at star date 3131.

Bombardment -- Find where the computer's posts are located.

D & D ADVENTURES (6307) (Text Games)

Quest -- Take your character through the many dungeons in search of treasure. All you can take with you is the items you purchase at the market: magic arrows, normal arrows, and healing potion.

Sword and Sorcery I & II — In these adventures you will run into trolls, goblins, and snakes as you search for valuable treasures.

Dragon Maze — Work your way through the maze while trying to avoid the red dragon. **(Joystick)**

ALIEN INVADERS I (6308) (Joystick)

Star Wars — Use your targeting sights to destroy the tie-fighters.

Battle of Hoth — Blow up the Empire's A-A-Walkers with your snow speeder.

Invader (Deka Vader) — Fire upon the invaders before they blow up you and your base.

Asteroyder — Fire on the invading aliens and asteroids.

Shooting Alien -- Blow up the aliens while avoiding their fire.

Apple Space — Maneuver in space to avoid the stars while trying to fire at them.

Meteor Storm — Blast your way through a severe meteor storm.

Alien Invasion — Score points by firing at the alien spaceship.

Alivader — Fire at the aliens to stop them from setting up bases.

ALIEN INVADERS II (6309) (Joystick)

Hires Alien — Gobble up the food before the alien sinks his teeth into you!

Martian Invader — Shoot as many Martians as you can before they shoot you.

Galaxia -- The Crindids, an intelligent species of plant life, are now trying to invade your galaxy. Stop them if you can.

No Man's Land — Destroy robots by luring them into fatal land mines.

Asteroids — Maneuver around and fire at the asteroids. Don't let them run into your ship.

Radar — You're in charge of a radar station. Your job is to protect the city from enemy missiles.

Saucer Invasion — Try to blow up the saucer.

SPACE FLIGHT (6310) (Joystick)

Lunar Landing — Land your lunar module on the landing pad.

Space Canyon — Try to fly down the canyon without crashing into the canyon walls.

Raiders of the Lost Ring — Fire at the invading ship to protect the rings of the base.

Moon Landing — Try your piloting skills at landing your space capsule on the moon.

SPORTS II (6321)

Golf — See how well you do on these courses.

Baseball — Play your favorite teams against each other.

Football — Match up your favorite teams for battle.

AIRPLANE FLIGHT (6311) (Joystick)

A.W.A.C.S. — Scramble your planes to protect your country against the enemy's planes.

Bomber — You're the ace pilot and you must try to blow up the enemy's tanks.

Sail Plane-- Try to land your sail plane on the 1,550 foot runway.

Airbattle-- Maneuver to blow up your opponent's plane.

Parachute — Can you maneuver your parachute in flight and land on the bulls-eye?

Dogfight — Just like the WWI aces - try to shoot down the 'enemy', but watch your back!

SEA HUNT (6312) (Joystick)

Sea Hunt — Drop your depth charges to sink the enemy's ships.

Caribbean Cruise — Try to sail around the ocean.

Elevate — Blow up the ship by figuring out proper elevation of the cannon.

Sea Battle — You are a sub commander and must try to destroy the enemy ships.

Mission U-Boat -- From your U-boat drop the depth charges to blow up the subs.

Sea War — With your ship's cannon you try to shoot down the planes.

Submarine — Drop depth charges on subs to blow them up.

Sink the Ship — Sharpen your hand-eye coordination - Drop bombs on the enemy ships to blow them up.

Midway — Maneuver your fighter plane in the Battle of Midway. Try to avoid the Japanese aircraft carrier's anti-aircraft weapons.

REAL TIME CHASE (6313) (Joystick)

Real Time Chase — Avoid the electronic robots and blocks!

Monster Chase — Try to make the monster fall into the pit.

Arena of Octos — In the Octon arena you must protect yourself against eight different types of warriors.

Timed Maze Race — Work your way through the maze in as little time as possible.

CAR COLLISION (6314) (Joystick)

Collision — Pick up as many points as you can without running into the other car.

Helicopter — Try to land your helicopter on top of the evading car without crashing.

Country Driver — Drive this country road trying not to miss turns while avoiding obstacles.

Head-On — Are you good enough to avoid a head-on collision?

LAS VEGAS FUN (6315)

Blackjack Strategy — Try to get 21 against this tricky dealer.

Craps — Bet on the roll of the dice.

Keno 2— See how well the numbers you selected pay off.

Roulette — On this wheel, there are 5 ways to pay off: black or red, odd or even, single number hit, high or low, and thirds hit.

Super Ace — Bet on the outcome of the dice throw.

Slot Machine — Play these five different one-armed bandits.

CARD GAMES I (6316)

Cribbage — Play against the computer to sharpen your skills.
Foundation — Have fun playing this form of solitaire.
Card Trick 3 — Can the computer guess the card you are thinking?
Acey Deucey — Bet on whether the third card you get falls between the two you already have.
Stud Poker — Play stud poker against this computerized dealer.

CARD GAMES II (6317)

Casino Royale — Play against this computerized dealer.
Improved Apple 21 — See how well you do playing blackjack against this computerized dealer.
Gin Rummy — Play gin rummy against the computer.

FUN DICE GAMES (6318)

Yahtzee — See who can get yahtzee!
Roll 'Em — Try to acquire 100 points before your opponent does.
Super Dice — Try to guess whether the roll will be over seven, under seven, or seven even.

HORSE RACES (Joystick) (6319)

Derby — Bet on your favorite horse as they race around the track.
Stadium -- Make horse and rider jump the hurdles without faulting.
Horse Race I, II, III or Horse Apple Downs — Bet on your favorite horse to win, place, or show.

SPORTS I (6320) (Joystick)

Hockey I — Make up your own hockey teams and players to play against each other in this text game.
Ping Pong — Try to score off your opponent to win!
Boxing — Try to knockout your opponent in this text game.
Volleyball — Try to keep the ball in play with these two-man teams.
Bowling — See how many strikes you get on this lane.

MARBLE FUN (6322)

Ultra Block — This is a Japanese version of Breakout.
Pinball Marble — Try to place a marble in every cup without any marbles falling through to the bottom.
Off the Wall — Clear as many blocks with as few shots as you can.

STOCK MARKET GAMES (6328)

Have fun buying and selling stocks and commodities.

PINBALL FUN (6323)

Have fun playing these four great pinball games: Flip It, Maxx's Madness, Super Blast, the Maxx Machine.

CHESS AND MORE (6324)

Othello with Doc — Place strategically to win this game.
Checkers— Have fun with this computerized version of checkers.
Chess — Can The Chessmaster (you!) defeat his opponent?

FANG HUNTER (6330) (Joystick)

Find the secret chambers where the count sleeps and destroy him.

FRUSTRATION AND MORE (6325)

Frustration — Try to turn all the boxes blue except one.
Hi-Q — Have fun playing this computerized Hi-Q.
Supernim — To win make sure you get the last piece.
Black Box — Try to guess which arrays the atoms are hidden on.
Fifteen Game — The object here is to get all 15 numbers in order.

WHEEL OF FORTUNE (6326) (Joystick)

Wheel of Fortune — Just like Wheel of Fortune (minus Vanna)
Monopoly I — Buy/sell property with this text version of monopoly.
Intercept — Try to pick up as many blocks as you can without hitting the borders or yourself.
Bingo — Displays random bingo numbers.

WORD PUZZLES (6327)

Puzzle Generator — Creates crossword puzzles.
Word Maze Maker — Creates word searches.
Mastermind — Play this computerized version of Mastermind.

Word Mastermind — Try to guess the 5 letter words.
Word Challenge — Try to figure out the word from the definition before your opponent.

BER ZAP (6331) (Joystick)

In this game, you maneuver through a maze while trying to escape the laser-shooting robots. A very colorful game!

ARCADE MACHINE (6332) (Joystick)

Have fun playing these three great arcade games: Beachhead, Westward Ho!, and Shark Bait.

ANOTHER TRIVIA GAME (6335)

This trivia game asks questions about all kinds of topics such as music, movies, history, science, and many, many other topics.

MYSTERY HOUSE (6334)

Try your skill on this challenging adventure. This adventure takes place in an old house with many rooms. As you enter the house, seven people will be dispersed throughout the house, and you start finding them dead! You must find the killer before he or she finds you!

MONOPOLY V2.00 (6340)

Buy, Sell, or Auction properties with this hi-res Pro-Dos game.

WORLD OF PINBALL (6350-6353) (4 disk set)

Have fun with these games: Rad Max, Flasher, Killer Pinball, Soft Pinball, Master Mind, Black Jack, Pinball Bomber, Meta Pin, Cool Jack, Magic Night, Super Pinball, The Blues, Killer Machine, and Bonsai. (req. 128K)

IIGS SECTION

All programs in this section require a Apple IIgs computer system and are available only on 3 1/2" disks.

VIRUS MD (7100)

Virus MD v1.1 - This version of Virus MD can detect and fix files infected with Festering Hate and Cyber Aids. Virus MD can repair your disk if damaged by these viruses, as well as update your boot block with Apple's official Pro Dos and GS/OS boot code.

Dr. Daily - This program is used to create the data files you want the doctor to check every day. The program saves the data into a data file on your boot-up disk.

Desktop.MOD - Select the color to paint with by clicking a rectangle under the select color words. Modify the desktop pattern by clicking on the grid of large rectangles. The pattern inside the sample rectangle will change as you do this. Click on the sample rectangle to apply this pattern to the whole screen. Select Save from the file menu to apply this pattern to your finder desktop pattern, then re-boot and the finder will show your desktop pattern.

Maxfile - A utility that allows you to rename, move, transfer, and/or delete files, check the system's memory, and change Pro Dos file types.

JUMPSTART V2.7 (7102)

Jumpstart is a program launcher and utility program that can be used as a replacement for the finder. Jumpstart allows you to create a master menu or run a list of programs and then run any of the programs with an easy mouse click. Also included with Jumpstart are three desk accessories: Alarm Clock, Area Code CDA, and Mouse Trap CDA. (requires 732K)

GRAPHICS I (7150) (req. Printshop for IIGS)

A great collection of pictures, borders, and fonts for Printshop. Includes 70 pictures, 20 borders, and 15 fonts.

GRAPHICS II (7151) (req. Printshop for IIGS)

Another great collection of all different pictures, borders, and fonts. Also with 70 pictures, 20 borders, and 15 fonts.

GRAPHICS III (7152) (req. Printshop for IIGS)

This collection features fonts, borders, screen patterns, and 72 more pictures.

GRAPHICS IV (7153) (req. Printshop for IIGS)

This collection contains pictures of animals, people, symbols, vehicles, and other miscellaneous pictures.

CHEAP PAINT (7160)

Cheap Paint is a full-featured paint program for your Apple IIGS that has at least 768K of memory. Cheap Paint has the usual features of most paint programs, including copy and paste, color cycling, brushes, stencils, and the adding of text. Cheap Paint will allow you to create and modify artwork in the 320 by 200 super hi-res mode.

FOUR-N-ROW (7201) (Mouse-driven)

Four-N-Row — This game is played just like Connect Four. Try to outsmart your opponent by getting four-in-a-row.

Tic-Tac-Toe — Have fun watching your child's strategic moves against the computer to get a Tic-Tac-Toe.

Follower — Play back the musical sequence the computer just played. A lot like Simon.

BACKGAMMON/OTHELLO (7216) (Mdriven)

Backgammon v1.1 - Improve your strategic backgammon skills against your computerized opponent.

Othello - The object of Othello is to change the majority of the tiles on the board to your color. This is accomplished by outflanking your computerized opponent's pieces.

SOLITAIRE AND MORE (7217) (Mouse-driven)

Solitaire — Enjoy playing this great graphic version of Casino Solitaire.

Pyramid Solitaire — The object of Pyramid Solitaire is to remove all the cards in the pyramid in pairs that add up to thirteen.

Monte Carlo — The object of Monte Carlo is to clear all the cards. When this game starts you have 20 cards layed down in a 5x4 pattern. By removing cards of the same type across, down, or diagonally, the remaining cards are dealt into the bottom of the 5x4 setup for you to remove until all cards are gone.

SHANGHAI AND MORE 7219 (Mouse-driven)

Shanghai — Shanghai is a Chinese game of strategy, memory, and luck. The object is to remove all 144 Mah-Jongg tiles arranged in a pile called the dragon.

Hanoi Towers — This program simulates the Towers of Hanoi puzzle. The object of Othello is to have the majority of the disks on the board showing your color. This is accomplished by outflanking your computerized opponent's pieces.

MONOPOLY ver. 2.0 7220 (Keyboard)

This program is based on the game Monopoly. You and your opponents buy, sell, or auction properties to own or build on. But beware of where your piece lands on the board and your cash on hand.

THE WORLD'S BEST ART (7170)

The World's Best Art includes digitized reproductions of the works of Dega's Ballet Rehearsal, Dali's Modern Art, Graham's Famous French Woman, Monet's 1900 Woman, Da Vinci's Mona Lisa, Wyeth's Helgia, and other works such as Celia The Famous Flapper, Can-Can Dancer, Bath of Three Women, Painter, Plato, Revel, Sophia, Susane, and Venus the Goddess.

STAR TREK (7172)

View 19 different graphics in SHR format of the crew of the U.S.S. Enterprise from Star Trek and Star Trek: The Next Generation. The pictures can be viewed through the windows program included on this disk.

What our customers are saying about Software Excitement!

" I am the type of person who likes to let companies know when I do not like a product. I also let companies know when I am pleased with their product. I am extremely pleased with your products. I ordered 24 programs from you several weeks ago and my children (along with myself) have had hours of enjoyment from the programs that I have purchased from you."

– Gwen from Shoemakersville, Pennsylvania

" With this letter I would like to say thank you for your fast, friendly service and if all companies would treat their customers with the same FAST, FRIENDLY service that you did, everyone would be much better off."

– John from Kalispell, Montana

" It is rare indeed for a business concern to respond as quickly and as thoughtfully as you did, and it is a pleasure to have you on my list of contacts for future software requirements. I have told all my computer-literate associates about Software Excitement!. . . Your service has made all the others, including the 'big boys' in the mail order business, look pale by comparison."

"Once again, let me express my appreciation for the great service, and for the satisfaction in working with a software outfit which puts ethics ahead of profits."

– Joe from Burton, South Carolina

(from two separate letters from Joe)

"So, as you can tell, I appreciate your promptness and plan to do business with you again! Please post this letter where everyone can see how being the best can make a guy in Evansville, Indiana happy enough to write a letter of thanks."

– Joe from Evansville, Indiana

" Not only have I never heard of a software company showing such interest in its customers, I have never dealt with any kind of company that went so far. Again, my thanks and appreciation!"

– Joseph from Boca Raton, Florida

What the experts are saying about Shareware and the Shareware concept

"It is possible to make a commercial success out of a program that's a piece of junk. It is not possible to do that with shareware."
-Jim Button, Noted Shareware Author

"... our poll indicates many user group members reject mainstream software in favor of shareware. 'I find there is very little in the commercial market that can't be found in shareware for a lot less money, and often the shareware programs are as good or better,' says Arthur Torrey from the Boston Computer Society."
-Steve Bass, PC World

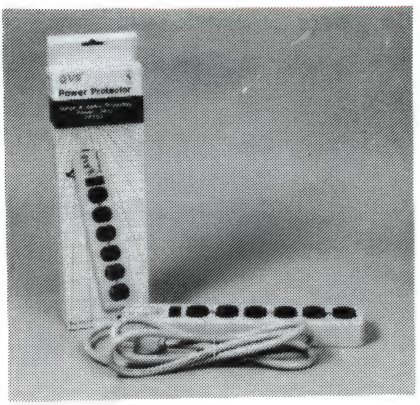
"The use of quality alternative software [shareware] by large institutions is not new. The Los Angeles Times uses PC Write exclusively. It's on all the reporters' desktop machines and remote laptops."

"This may be the finest piece of word processing code ever written. I have never been so impressed with anything as I have with VDE v1.5."
-John Dvorak, PC Magazine

"Many shareware programs, besides offering a cost savings of 50 percent or so over some commercial applications, also perform better."
-Hardin Brother, PC Resource

"Shareware also offers something that you will never find in the commercial software world—the opportunity for direct contact with the person who wrote the program ... shareware authors prize customer feedback. Most are keenly interested to know which features you like and which features and capabilities you would like to see in future versions."
-Alfred Glossbrenner, Writer/Software Critic

PROTECT YOUR COMPUTER WITH OUR
POWER SURGE PROTECTORS

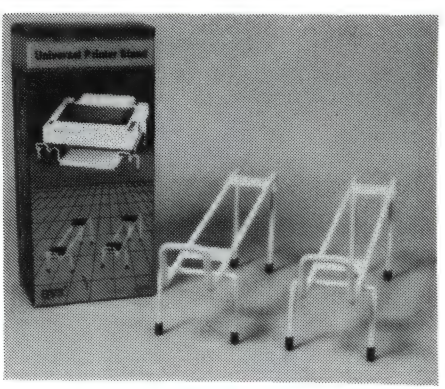


$13.95

- ✓ U.L. Listed and Approved
- ✓ 125 Volts - 15 Amp circuit breaker
- ✓ Reset switch
- ✓ 6 feet of heavy duty cord
- ✓ Lighted Master Switch
- ✓ 6 surge and spike pro tected power outlets!

UNIVERSAL PRINTER STAND

Designed to accommodate any size printer with top or bottom feed.



only $12.95

Unit includes:

Acoustic damper for noise and vibration reduction

ORDERING INFORMATION

PLACING ORDERS

The easiest way to place an order is by telephone with your credit card. Simply call us toll free at 1-(800)-444-5457. Please have your credit card and program disk numbers ready for our telephone operators. If you prefer, you can fax your order (503-826-8090) or place your order by mail. Just fill out this order form and mail it to: Software Excitement!

P.O. Box 3072 • Central Point, Oregon 97502

WARRANTIES / RETURNS

Our quality control methods and our care in selecting programs guarantee that very few problems occur for our customers (Our return/exchange rate is less than 1/2 of 1%!) We guarantee that you will receive programs that run on a computer system which meets the minimum and specific requirements printed in this catalog. We will replace any defective disk or non-working program if you return it to us within 30 days of receipt. **You must call our technical support line at (503) 826-8098 before returning a disk or other item for exchange or refund.** Always check for specific program requirements before ordering a program or reporting one as defective.

TECHNICAL SUPPORT

We go to great lengths to make the software we distribute easy to use. However, we are available for technical assistance if you need it. Our technical support phone number is (503) 826-8098 and our support hours are from **8 AM - 5 PM Pacific Time** (11 AM - 8 PM Eastern). Please remember that we carry hundreds of programs written by hundreds of programmers and therefore cannot give detailed instructions on how to use each specific program. Our support is limited to getting you started. It is your responsibility to read the included manuals and instructions for each program.
